

# UNIQUE DRILLING FLUIDS

1222 Commerce St. STE. 2417 Dallas, TX 75202: 214-741-1100: [info@uniquedrillingfluids.com](mailto:info@uniquedrillingfluids.com)

## Product Data

## UNI-YIELD

RHEOLOGY YIELD ENHANCER

**UNI-YIELD** is a special blend of high molecular weight fatty acids, dissolved in a hydrocarbon liquid. This special formulation gives energy to the oil base drilling fluid system by immediately increasing the mud's yield. It is particularly useful in clean oil or synthetic systems. It is an effective solution to problematic rheology issues.

### Application

**UNI-YIELD** should be used at the minimum amount necessary to achieve desired rheology/yield. If over treated a thinner will be required. Mud plant shearing equipment generates the increasing yield with minimum difficulty. 2 pounds per barrel increases the yield figure by a factor of 3.

**GIVES THE WELL WHAT IT NEEDS**

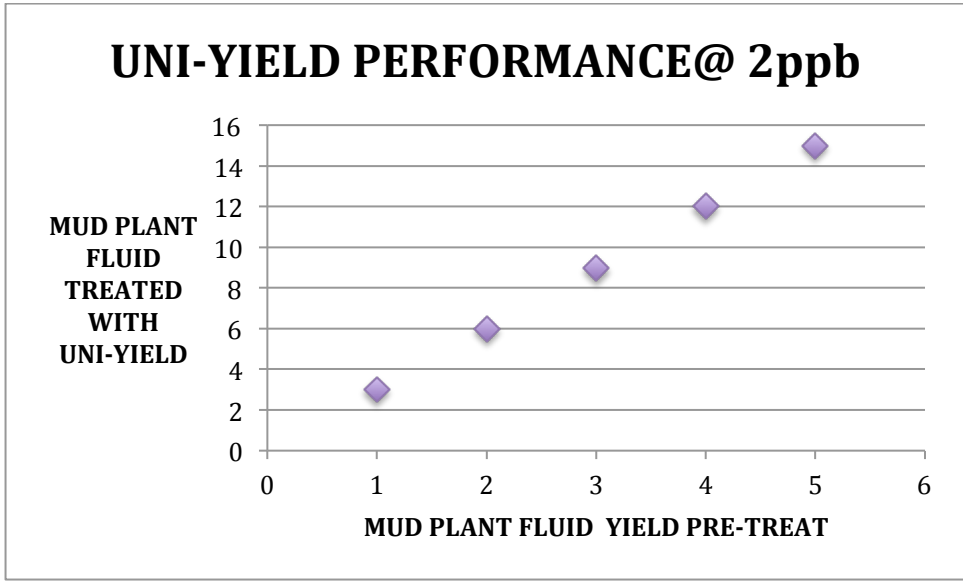

FIGURE 1. Mud plant fluid yield before and after treatment of UNI-YIELD at 2ppb.

TYPICAL PHYSICAL PROPERTIES

Appearance:	Amber liquid
Specific Gravity @ 20 Deg C:	0.88 to 0.98
Viscosity @ 20 Deg C:	Below 500 cps
Flash Point (PMCC):	Above 150 Deg F
Pour Point:	Below 0 Deg C
Solubility:	Oil
pH:	5.5 to 6.5

**Packaging**

**UNI-YIELD** is supplied in 55 US gallon drums/ 208 L
